## Revised and Expanded List of the Vernacular Names of the Lepidoptera in Turkish Language

Muhabbet Kemal Ahmet Ömer Koçak

**Abstract:** Revised and Expanded List of the Vernacular Names of the Lepidoptera in Turkish Language. *Priamus* 12 (4): 95-125.

This paper deals with the vernacular names in Turkish language of the Lepidoptera species and subspecies of Turkey in the World. Totally 2326 species group names of various butterfly and moth families, are listed together with the revised vernacular names in Turkish.

**Key Words:** *Lepidoptera*, list, species, subspecies, vernacular names, Turkish language.

In the first attempt on the vernacular names of the Lepidoptera of Turkey, totally 375 species were listed by the authors (Koçak & Kemal, 2001)<sup>1</sup>. In the subsequent publications authors used Turkish vernaculars in various faunal publications<sup>2,3,4,5</sup>, or added new proposals. Separately, in several internet sites, and ecological books, the vernaculars, proposed by the authors, have been widely using.

In the present list, all the previously submitted vernacular names in Turkish are revised from the linguistical standpoint and expanded to the exotic groups of the butterflies and moths.

**Priamus<sup>6</sup>****ISSN 1015-8243**

Priamus is the first international serial publication of the Centre for Entomological Studies Ankara, and appears in volumes at irregular intervals. Each volume is composed of four or six parts.

The serial serves as a refereed publication outlet and accepts original manuscripts of the researchers of the Cesa. Articles accepted deal with the Insect taxonomy, nomenclature, morphology, bibliography, check-list, fauna, biodiversity, distribution, biogeography, ecology, insect-plant interactions, bionomy, and behaviour. The Cesa is a non-profit organization, no royalties will be paid to the authors of contributions. Papers accepted become the copyright of the journal. The publication languages are Turkish, English, German, Uighur language, and Chinese.
